[Data 2025](#)

The most current released version is the [OWASP Top Ten 2025](#).

Previous versions are available at [OWASP Top Ten 2021](#) and [OWASP Top 10 2017 \(PDF\)](#). Older versions are available in the [Github repo](#).

The OWASP Top 10 is a standard awareness document for developers and web application security. It represents a broad consensus about the most critical security risks to web applications.

Globally recognized by
developers as the first
step towards more
secure coding.

The OWASP® Foundation

works to improve the security of software through its community-led open source software projects, hundreds of chapters worldwide, tens of thousands of members, and by hosting local and global conferences.

[Accept](#)

Companies should adopt this document and start the process of ensuring that their web applications minimize these risks. Using the OWASP Top 10 is perhaps the most effective first step towards changing the software development culture within your organization into one that produces more secure code.
